

USP
PROFILES

QUALITY CUSTOM PROFILES
ENGINEERED WITH VALUE IN MIND

With its vast experience in vinyl extrusions and competitive manufacturing facilities, USP Profiles offers its extrusion capabilities to various industries in North America that use custom profiles. While USP Profiles' large scale manufacturing facilities provide for highly competitive pricing, its local presence in the U.S. provides advantages in customization, smaller run sizes, lower shipping costs and meeting fast turn-around requirements.

Established in 1983, US Polymers has four divisions including Building Materials, Custom Profiles, Storage Buildings and Window Shutters. As a member of the Harwal Group, USP Profiles has access to the latest in PVC technologies and capabilities.

Management

QUALITY CUSTOM PROFILES ENGINEERED WITH VALUE IN MIND

When you choose US Polymers you're choosing products that are made in the USA by a company that's dedicated to quality and value engineered products.

At US Polymers our research and development efforts keep us at the leading edge of the industry. All our products are built to the highest quality standards. Our manufacturing facilities adhere to ISO9001 principles and meet all ASTM standards, ensuring reliable high-quality products for you. We back our products with industry leading warranties and guarantee that our customers will be satisfied with their purchase of our products.

We're proud to manufacture our products in the USA, creating employment and opportunities for the U.S. economy.

USP PROFILES

Quality Assurance

QUALITY YOU CAN
COUNT ON

At USP Profiles, we believe it is our duty to deliver quality products that exceed our customers standards. Our products adhere to ISO9001 principles and meet all ASTM standards, ensuring reliable, high-quality products for you. Our in-house quality control labs and teams ensure that all products meet and surpass industry standards.

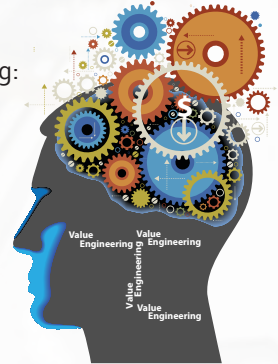

Value Engineering

OPTIMIZE YOUR IDEAS
WITH OUR
DESIGN ENGINEERING

With our full staff of in-house engineers, we optimize your ideas with the perfect product design that reduces costs and maximizes function. Design optimization includes the following:

- Value Engineering
- Low Output & High Output Tooling
- In-line Taping
- In-line Wood Graining
- Routing
- Sawing
- Special Packaging & Labeling

Capabilities

IN-LINE OPERATIONS AND
TECHNICAL EXPERTISE
MAKE A DIFFERENCE

By combining years of experience with technical knowledge we create the most cost effective and stream-lined solutions for our customers. Your ideas will take shape with our diverse manufacturing capabilities and services. Our capabilities include:

- Assembly
- In-line Taping
- In-line Texturizing
- In-line Wood Graining
- Notching
- Punching
- Routing
- Sawing
- Special Packaging & Labeling
